HONORARY EDITORS

Dr. D.G. Haigh (*formerly of Imperial College, London*)
M.J. Withers (*ERA Technology Ltd., Surrey*)

Pages in issues of *IEE Proceedings Part G*, 1986

Pages	Issue No.	Date
1–76	1	February
77–120	2	April
121–164	3	June
165–232	4	August
233–272	5	October
273–300	6	December

This publication is copyright under the Berne Convention and the International Copyright Convention. All rights reserved. Apart from any copying under the UK Copyright Act 1956, part 1, section 7, whereby a single copy of this article may be supplied, under certain conditions, for the purposes of research or private study, by a library of a class prescribed by the UK Board of Trade Regulations (Statutory Instruments, 1957, no. 868), no part of this publication may be reproduced, stored in a retrieval system or transmitted in any form or by any means without the prior permission of the copyright owners. Permission is, however, not required to copy abstracts of papers or articles on condition that a full reference to the source is shown.

An IEE licensing arrangement exists whereby organisations entering into an agreement are legally entitled to make up to twenty copies of an IEE paper or article.

Authorisation to photocopy items for internal or personal use, or for the internal or personal use of specific clients, is granted by the Institution of Electrical Engineers for libraries and other users registered with the Copyright Clearance Center Transactional Reporting Service, provided that the base fee of $2.00 per copy is paid directly to the Copyright Clearance Center, Inc., 21 Congress Street, Salem, MA 01970, USA. 0143–7089/86 $2.00 + 0.00. This consent does not extend to other kinds of copying, such as copying for general distribution, for advertising or promotional purposes, for creating new collective works, or for resale.

Photocopies of individual papers published in the *IEE Proceedings* can be supplied from the IEE Library at 10p per page plus a handling change of 50p per page, which covers the cost of surface mail (airmail extra). The handling charge is waived if reprints are collected from Savoy Place by purchasers.

The telephone number of the IEE London office is 01 240 1871; telex: 261176 IEELDN G; facsimile: 01 240 7735

The IEE is not as a body responsible for the opinions expressed by individual authors.
The IEE is a member of the Association of Learned & Professional Society Publishers.

Subject index

ACTIVE NETWORKS

Multiple critical pole maximally flat *RC* active filter with sharp cutoff. P. Thajchayapong, C. Kimpan and Y. Rungsunseri p285

ALGORITHMS

Algorithmic determination of linear-feedback in a shift register for pseudorandom binary sequence generation. N.P. Cagigal and S. Bracho p191
Closed form approach to minimax design of 1-dimensional recursive digital filters. C. Charalambous p121
Computer generation of topological equations and pseudocircuits for the self testing analogue fault diagnosis algorithm. C.-C. Wu and Y.-Y. Wu p273
Constrained optimisation in the PECOD program. X.M. Xiao and Y.C. Shen p159
Easy generation of small-*N* discrete Fourier transform algorithms. R. Stasiński p133
Microprocessor based polarity correlation using the skip algorithm. J.R. Jordan, B. Kiani-Shabestari and M. Napthine p227
New algorithm for transient suppression for images due to incomplete or partial boundary data. G. Eichmann and L.M. Roytman p27
Recursive addition and its parameterisation in VLSI. H.C. Yung and C.R. Allen p256

CIRCUIT THEORY AND DESIGN

Analysis and synthesis of static power convertors. D. Levy and E. McQuade p39
Approximate method for hand computation of nonlinear distortion performance of varactor tuning circuits. M.T. Abuelma'atti p265
Closed form approach to minimax design of 1-dimensional recursive digital filters. C. Charalambous p121
Constrained optimisation in the PECOD program. X.M. Xiao and Y.C. Shen p159
Design of low intersymbol interference partial response data transmission filters. A. Adama and L.F. Lind p195
Designing active filters with linear transformations using off-the-shelf building blocks. J.A. Papadakis p216
Direct analysis of stray-insensitive switched-capacitor networks using signal flow graphs. G.S. Moschytz and J.J. Mulawka p145
Early history of the high-fidelity finite-impulse-response filter. R.H. Wilkinson p243
Exact discrete time synthesis. H.M. Yassine p209
High-speed encoder for the 16B9Q line code. A.H. Prystajecky, P.A. Goud and C.G. Englefield p115
Low-noise power-efficient oscillators: theory and design. J.K.A. Everard p172
Method to design FIR Hilbert transformers for delta modulated signals. V. Anastassopoulos and T. Deliyannis p113
Multimemory block structure for implementing a digital adaptive filter using distributed arithmetic. C.-H. Wei and J.-J. Lou p19
Multiple critical pole maximally flat *RC* active filter with sharp cutoff. P. Thajchayapong, C. Kimpan and Y. Rungsunseri p285
Multiple fault location in AC circuits. J. Rutkowski and A. Macura p279
Multiple-loop-feedback switched-capacitor filters using approximating biquads. S. Fotopoulos and T. Deliyannis p84
Precise insensitive tunable *RC*-oscillator realisation using current conveyors. R. Nandi p129
Rectifier circuit performance: some new approximate formulas. Addendum. A.G. Bogle p128
SCNSOP: a switched-capacitor circuit simulation and optimisation program. L. Yue and S.Y. Chao p107
Simple automatic current/voltage characteristics plotter for solar cells and arrays. G. Bhattacharya and H. Saha p289
State-space switched capacitor filter design based on single-operational-amplifier biquads. V.I. Georgiev and K.P. Stantchev p251
Stray-free switched-capacitor general biquad blocks. A.E. Said and M.E. Zaghloul p154
Synthesis of non-series-parallel *LC* one-port networks. B. Shahzadi p181 e250
Two new Miller theorems. C. Miron, P. Ogrutan and E. Wardegger p271

COMPUTER SIMULATION

SCNSOP: a switched-capacitor circuit simulation and optimisation program. L. Yue and S.Y. Chao p107

COMPUTER-AIDED DESIGN

Constrained optimisation in the PECOD program. X.M. Xiao and Y.C. Shen p159
SCNSOP: a switched-capacitor circuit simulation and optimisation program. L. Yue and S.Y. Chao p107

CONVERTORS

Analysis and synthesis of static power convertors. D. Levy and E. McQuade p39
Modelling and analysis of the Ćuk convertor using the discrete impulse response method. L. Martinez, A. Poveda and J.M. Miguel p77

DESIGN

Designing active filters with linear transformations using off-the-shelf building blocks. J.A. Papadakis p216
Multiple critical pole maximally flat *RC* active filter with sharp cutoff. P. Thajchayapong, C. Kimpan and Y. Rungsunseri p285
State-space switched capacitor filter design based on single-operational-amplifier biquads. V.I. Georgiev and K.P. Stantchev p251

DIGITAL CIRCUITS

Digital filter functions with short coefficients. J.J. Narraway and R. Venkatesan p30
Kharitonov's theorem and stability test of multidimensional digital filters. N.K. Bose and E. Zeheb p187
Multimemory block structure for implementing a digital adaptive filter using distributed arithmetic. C.-H. Wei and J.-J. Lou p19
On minimisation of word length of multidimensional filter realisations. L.M. Roytman, E. Plotkin and M.N.S. Swamy p35
Short-time spectrum analyser based on delta-sigma modulation. E.C. Georgoudis and D. Lagoyannis p295

DIODES

Approximate method for hand computation of nonlinear distortion performance of varactor tuning circuits. M.T. Abuelma'atti p265

ELECTRONIC CIRCUITS

Correlation algorithms, circuits and measurement applications. J.R. Jordan p58 d255
Multiple fault location in AC circuits. J. Rutkowski and A. Macura p279

FAULT DETECTION

Computer generation of topological equations and pseudocircuits for the self testing analogue fault diagnosis algorithm. C.-C. Wu and Y.-Y. Wu p273

FAULT LOCATION

Multiple fault location in AC circuits. J. Rutkowski and A. Macura p279

FEEDBACK

Algorithmic determination of linear-feedback in a shift register for pseudorandom binary sequence generation. N.P. Cagigal and S. Bracho p191
Approach to the analysis of nonlinear feedback oscillators under large-signal injection. E.F. Calandra and A.M. Sommariva p233 e284

FILTERS AND FILTERING

Additional properties of one-dimensional limit cycles. D.C. McLernon and R.A. King p140
Closed form approach to minimax design of 1-dimensional recursive digital filters. C. Charalambous p121
Design of low intersymbol interference partial response data transmission filters. A. Adama and L.F. Lind p195
Designing active filters with linear transformations using off-the-shelf building blocks. J.A. Papadakis p216
Digital filter functions with short coefficients. J.J. Narraway and R. Venkatesan p30
Early history of the high-fidelity finite-impulse-response filter. R.H. Wilkinson p243
Exact discrete time synthesis. H.M. Yassine p209
General analogue-to-digital transformation. H.M. Yassine p89
Kharitonov's theorem and stability test of multidimensional digital filters. N.K. Bose and E. Zeheb p187
Method to design FIR Hilbert transformers for delta modulated signals. V. Anastassopoulos and T. Deliyannis p113
Multimemory block structure for implementing a digital adaptive filter using distributed arithmetic. C.-H. Wei and J.-J. Lou p19
Multiple critical pole maximally flat *RC* active filter with sharp cutoff. P. Thajchayapong, C. Kimpan and Y. Rungsunseri p285
Multiple-loop-feedback switched-capacitor filters using approximating biquads. S. Fotopoulos and T. Deliyannis p84
New results on the statistical properties of pseudonoise sequences. A.A.A. Al-Mukhtar and L.F. Turner p99
On minimisation of word length of multidimensional filter realisations. L.M. Roytman, E. Plotkin and M.N.S. Swamy p35
On the splitting of a complex-coefficient polynomial. M. de P. Barros and L.F. Lind p95
Optimal design of discrete coefficient DFTs for spectral analysis: extension to multiplierless FFTs. W.A. Perera and P.J.W. Rayner p8
Optimal design of discrete coefficient DFTs for spectral analysis. W.A. Perera and P.J.W. Rayner p1
State-space switched capacitor filter design based on single-operational-amplifier biquads. V.I. Georgiev and K.P. Stantchev p251

GRAPH THEORY AND TOPOLOGY

Direct analysis of stray-insensitive switched-capacitor networks using signal flow graphs. G.S. Moschytz and J.J. Mulawka p145

HISTORY

Early history of the high-fidelity finite-impulse-response filter. R.H. Wilkinson p243

INSTRUMENTATION AND MEASURING SCIENCE

Applications of built-in-test equipment within large systems. W.R. Moore and R.I. Damper p221
Simple automatic current/voltage characteristics plotter for solar cells and arrays. G. Bhattacharya and H. Saha p289

INTEGRATED CIRCUITS

Performance comparison of integrated continuous-time integrators containing matched MOS transistors. Z. Czarnul p203
VLSI implementation of a 5-trit full adder. H.T. Mouftah and A.I. Garba e38

LOGIC

High-speed encoder for the 16B9Q line code. A.H. Prystajecky, P.A. Goud and C.G. Englefield p115
VLSI implementation of a 5-trit full adder. H.T. Mouftah and A.I. Garba e38

MATHEMATICAL TECHNIQUES

Additional properties of one-dimensional limit cycles. D.C. McLernon and R.A. King p140
Algorithmic determination of linear-feedback in a shift register for pseudorandom binary sequence generation. N.P. Cagigal and S. Bracho p191

Analysis and synthesis of static power convertors. D. Levy and E. McQuade p39
Closed form approach to minimax design of 1-dimensional recursive digital filters. C. Charalambous p121
Computer generation of topological equations and pseudocircuits for the self testing analogue fault diagnosis algorithm. C.-C. Wu and Y.-Y. Wu p273
Correlation algorithms, circuits and measurement applications. J.R. Jordan p58 d255
Correlations of wave variables in a passive network. R.E. Bogner and B.R. Davis p165
Digital filter functions with short coefficients. J.J. Narraway and R. Venkatesan p30
Easy generation of small-*N* discrete Fourier transform algorithms. R. Stasiński p133
Exact discrete time synthesis. H.M. Yassine p209
General analogue-to-digital transformation. H.M. Yassine p89
Multiple-loop-feedback switched-capacitor filters using approximating biquads. S. Fotopoulos and T. Deliyannis p84
New algorithm for transient suppression for images due to incomplete or partial boundary data. G. Eichmann and L.M. Roytman p27
New results on the statistical properties of pseudonoise sequences. A.A.A. Al-Mukhtar and L.F. Turner p99
On the splitting of a complex-coefficient polynomial. M. de P. Barros and L.F. Lind p95
Optimal design of discrete coefficient DFTs for spectral analysis: extension to multiplierless FFTs. W.A. Perera and P.J.W. Rayner p8
Optimal design of discrete coefficient DFTs for spectral analysis. W.A. Perera and P.J.W. Rayner p1

MATRIX ALGEBRA

Analysis and synthesis of static power convertors. D. Levy and E. McQuade p39

MEASUREMENT AND MEASURING

Correlation algorithms, circuits and measurement applications. J.R. Jordan p58 d255
Microprocessor based polarity correlation using the skip algorithm. J.R. Jordan, B. Kiani-Shabestari and M. Napthine p227

MICROPROCESSORS

Microprocessor based polarity correlation using the skip algorithm. J.R. Jordan, B. Kiani-Shabestari and M. Napthine p227

MODELLING

Modelling and analysis of the Ćuk convertor using the discrete impulse response r ethod. L. Martínez, A. Poveda and J.M. Miguel p77
New results on the statistical properties of pseudonoise sequences. A.A.A. Al-Mukhtar and L.F. Turner p99

MODULATION

Short-time spectrum analyser based on delta-sigma modulation. E.C. Georgoudis and D. Lagoyannis p295

NETWORKS

Correlations of wave variables in a passive network. R.E. Bogner and B.R. Davis p165
Direct analysis of stray-insensitive switched-capacitor networks using signal flow graphs. G.S. Moschytz and J.J. Mulawka p145
Synthesis of non-series-parallel *LC* one-port networks. B. Shahzadi p181 e250
Two new Miller theorems. C. Miron, P. Ogrutan and E. Wardegger p271

NOISE AND INTERFERENCE

Low-noise power-efficient oscillators: theory and design. J.K.A. Everard p172

NONLINEAR SYSTEMS

Approach to the analysis of nonlinear feedback oscillators under large-signal injection. E.F. Calandra and A.M. Sommariva p233 e284
Short-time spectrum analyser based on delta-sigma modulation. E.C. Georgoudis and D. Lagoyannis p295

OPTIMISATION

Constrained optimisation in the PECOD program. X.M. Xiao and Y.C. Shen p159

OSCILLATORS

Approach to the analysis of nonlinear feedback oscillators under large-signal injection. E.F. Calandra and A.M. Sommariva p233 e284
Low-noise power-efficient oscillators: theory and design. J.K.A. Everard p172
Precise insensitive tunable *RC*-oscillator realisation using current conveyors. R. Nandi p129

POLYNOMIALS

On the splitting of a complex-coefficient polynomial. M. de P. Barros and L.F. Lind p95

REVIEWS OF PROGRESS

Applications of built-in-test equipment within large systems. W.R. Moore and R.I. Damper p221

SIGNAL PROCESSING

Method to design FIR Hilbert transformers for delta modulated signals. V. Anastassopoulos and T. Deliyannis p113
New algorithm for transient suppression for images due to incomplete or partial boundary data. G. Eichmann and L.M. Roytman p27

SIMULATION

Designing active filters with linear transformations using off-the-shelf building blocks. J.A. Papadakis p216
Recursive addition and its parameterisation in VLSI. H.C. Yung and C.R. Allen p256
SCNSOP: a switched-capacitor circuit simulation and optimisation program. L. Yue and S.Y. Chao p107

SOLAR CELLS

Simple automatic current/voltage characteristics plotter for solar cells and arrays. G. Bhattacharya and H. Saha p289

STABILITY

Kharitonov's theorem and stability test of multidimensional digital filters. N.K. Bose and E. Zeheb p187
On minimisation of word length of multidimensional filter realisations. L.M. Roytman, E. Plotkin and M.N.S. Swamy p35

SWITCHED CAPACITOR FILTERS

State-space switched capacitor filter design based on single-operational-amplifier biquads. V.I. Georgiev and K.P. Stantchev p251

TOPOLOGY

Computer generation of topological equations and pseudocircuits for the self testing analogue fault diagnosis algorithm. C.-C. Wu and Y.-Y. Wu p273
Direct analysis of stray-insensitive switched-capacitor networks using signal flow graphs. G.S. Moschytz and J.J. Mulawka p145
Multiple fault location in AC circuits. J. Rutkowski and A. Macura p279

TRANSISTORS

Performance comparison of integrated continuous-time integrators containing matched MOS transistors. Z. Czarnul p203

TRANSMISSION LINES

Correlations of wave variables in a passive network. R.E. Bogner and B.R. Davis p165

VERY LARGE SCALE INTEGRATION

Recursive addition and its parameterisation in VLSI. H.C. Yung and C.R. Allen p256

Book reviews

Applications of analog integrated circuits S. Soclof p119

IEE commissioned reviews

Jordan, J.R. Correlation algorithms, circuits and measurement applications p58 d255
